**CLINICAL INDICATION**

[ ]

Previously established gestational age: [ ]

Established EDD [ ]

**FETAL GROWTH**

BPD: [ ] cm ([ ] percentile)

HC: [ ] cm ([ ] percentile)

AC: [ ] cm ([ ] percentile)

FL: [ ] cm ([ ] percentile)

**Fetal heart rate** : [ ] bpm (normal range 110-170)

**Position**, if breech, describe hip position [extension/flexion]  
describe knee position [extension/flexion]

**Fetal movements**: [normal activity / decreased activity] (Comment if fetal breathing and limb movements seen)\*

**Estimated weight**: [ ] grams on the [ ] percentile, specify chart used and if customised

Previous EFW measurement and date if applicable: [ ]

N.B. growth chart demonstrating trajectory of previous EFW should be provided if possible in the report

**Uterine artery**: Pulsatility Index [ ] ([ ] percentile) +/- RI. As a minimum, the PI must be reported.

**Uterine artery flow** : diastolic flow present / absent / reversed

**Maternal carotid artery**: Pulsatility Index [ ] ([ ] percentile),

Perform if

-specifically requested

-signs of suboptimal fetal growth (EFW at or below the 10<sup>th</sup> centile) or if the

-UA PI is >95<sup>th</sup> centile

**AFI** [ ] (5-25 normal) Deepest pocket [ ] cm

**Amniotic fluid** : [ ] [ < > ] mm from the internal cervical os.

**Cervix**: [ ] mm closed length, only if requested

Limited **anatomy survey** within the limits of late gestation, fetal lie, and maternal conditions.

**CONCLUSION**

Fetal EFW is on the [ ] percentile. Reassuring well-being with fetal biometry in normal range.

If <10th centile, small for gestational age and if >90th centile, large for gestational age

If applicable: previous scan on date (DD/MM/YYYY) demonstrated the EFW to be on the [ ] percentile (see appended growth chart).
